

Knee Follow-Up

3-month Interval

It is important to review the status of your knee implant(s) during an office visit at **four weeks, three months, one year, two years, and every other year postoperatively thereafter** even if you are feeling great. Long distance follow-up evaluations for out-of- state patients are fine. We would like to ask you to complete the following evaluation protocol.

Summary of this Follow-Up

1. Knee questionnaire (pg 3): We keep track of each joint separately in our database. Therefore, I would like to request that you fill out a self-rating form for EACH knee, even if both are identical. Please send to us.
2. Physical Therapy (pg 7):
 - a. Fill your information on the PT evaluation request form
 - b. Give the PT letter and form to your physical therapist for completion
 - c. Mail the results to us.
3. Knee X-Ray (pg 9):
 - a. Add your name and DOB to the x-ray request
 - b. Have the x-ray of your knee(s) done at your local hospital or local hospital or freestanding radiology facility and request a CD copy of this x-ray be sent to us

As soon as we receive all of the above, Dr. Gross will review them and send you a written response. If you prefer to travel here for an office visit for evaluation, please call our appointment line to arrange this (803)-256-4107 (*routine office charges will apply*). If you are having significant problems with your knee, I will need to see you in the office for complete examination to best diagnose it.

Thank you for your attention to this matter. If you have any questions, please contact us for assistance.
